Pringle Robotics Delivers Autonomous Robotic Solutions for the Restaurant Industry

Pringle Robotics to Exhibit at The National Restaurant Association Show, May 20-23, 2023

Peoria, IL, USA [May 20, 2023] – Pringle Robotics, a developer of autonomous robotic solutions for the restaurant, hospitality, facilities management, school and healthcare industries, will showcase its line of hospitality-focused service robots at The National Restaurant Association Show. As an exhibitor at the Show, an event bringing together more than 51,000 foodservice professionals from 112 different countries and representing over 900 product categories, Pringle Robotics will be able to connect with the industry and share leading-edge technology and solutions for the year ahead in Chicago, Illinois.

Pringle Robotics is an integrated robotic solutions developer headquartered in Peoria, Illinois, with business development offices in key locations across the country. The company was founded by software developer and entrepreneur Sudheer Sajja after he saw that many of his clients in the restaurant industry were struggling with dual issues that came to a head during the pandemic—lack of staff and a need to regularly and deeply sanitize communal spaces.

Today Pringle Robotics boasts many different autonomous BoTs within its fleet, with more in development. The BoTs on display at the National Restaurant Association Show are:

BellaBoT - a versatile delivery BoT with an interactive kitty face and pleasant voice. Great for supporting food expediting at both limited and full service restaurants

SwiftBoT - a secured delivery unit with advanced maneuverability for crowded environments. Excels at food expediting, dish bussing and more.

KettyBoT - a delightful hosting and light delivery BoT perfect for guiding guests to their seats or other locations, delivering drinks and displaying information about specials, events or even third-party advertising.

HolaBoT - a heavy-duty dish bussing BoT with a workflow programmed specifically to make dish bussing more efficient.

CC1 - a wet and dry floor cleaning robot with several cleaning modes. Autonomously cleans all types of hard floors and carpets on regular schedules, or ad-hoc runs when needed.

BubbleFish - a compact and affordable disinfection solution that uses dry-mist to sanitize indoor spaces, bringing a new level of cleanliness and peace of mind to customers.

Stop by Booth #10642 to meet the Pringle Robotics BoT fleet.

“Pringle Robotics was born out of our founder’s deep ties to the restaurant industry,” said Gerald Prall, sales director for Pringle Robotics. “Being able to share our purpose-built robotic solutions directly with industry professionals at the Show feels like coming home.”

“We’re pleased to welcome Pringle Robotics as exhibitor at the 2023 Show,” said Tom Cindric, President of Winsight Exhibitions. “The annual event showcases the latest in foodservice innovation and continues to inspire menus, revitalize beverage programs, initiate equipment investments and pioneer groundbreaking technology. We’re thrilled to bring together start-ups, niche brands and the biggest names in the industry to help foodservice professionals solve for today’s biggest challenges including workforce shortages, labor costs and overall operational efficiency.”

As the global restaurant and hospitality industry’s premier trade show, the National Restaurant Association Show is the place to explore everything that’s happening in the hospitality industry, from the latest food and beverage trends to emerging technology. It’s all here! For more information, visit nationalrestaurantshow.com.

About Pringle Robotics

Headquartered in Peoria, Illinois, Pringle Robotics is a developer of integrated robotic solutions for people-focused industries. We create service robots that help people work smarter, faster and with less stress so that they, in turn, can better deliver the high-value customer care that matters most. Our line of BoTs ranges from hosting, serving, dish bussing and delivery for the restaurant industry to cleaning, disinfection and secured delivery for complex, large scale facilities like hospitals and hotels. But our scope is never static—we think there’s a place for

service-oriented robotic solutions wherever people gather together. Visit us at <https://pringlerobotics.ai/>

The National Restaurant Association Show, Hotel-Motel Show is owned and operated by Winsight LLC in partnership with the National Restaurant Association.
