Better Earth Introduces New 2 and 3 Taco Clamshells & Expands Team to Enhance Foodservice Industry Sustainability

Better Earth expands its product line and adds new team members ahead of the National Restaurant
Association Show

ATLANTA, GA-May 16, 2023 – Better Earth Compostable Products, a leader in sustainable foodservice packaging solutions, is pleased to announce the launch of its new 2 and 3 Taco Clamshells and the expansion of its team with four new hires, dedicated to helping clients achieve and surpass their sustainability objectives.

The innovative 2 and 3 Taco Clamshellsare designed to provide a convenient, eco-friendly solution for enjoying on-the-go tacos. Crafted from unbleached bamboo fiber, these 100% compostable and environmentally responsible containers are free of PFAs, wax, and plastic linings, making them a superior and sustainable choice for **6**odservice packaging.

The freezer-safe, soak-proof design ensures tacos remain fresh and delicious during transit, while the containers compost in just 2 to 4 months in a commercial composting facility, leaving no waste or harmful residues behind.

Key Features:

- All-natural, PFAS-free bamboo fiber that is oil and grease resistant
- Versatile and flexible, with two and three holder options to meet your needs
- Made of FDA compliant, food-grade material
- Proprietary designs enable better opening with locking lid snaps over a better fitting clamshell
- Fully compostable and complies with ASTM standards (BPI certification pending)
- Suitable for hot and cold foods, from tacos to hot dogs, cannolis, sushi, lobster rolls, and
- Custom 4-color printing is available

Better Earth's industry leading custom printing capabilities are also available to customize the branding of the new 2 and 3 taco clamshells, enabling food service operators, restaurants, taco trucks and everyone in-between the ability to own sustainability in their own style.

In addition to bringing innovative new products to the Better Earth portfolio, we are excited to bring on new team members at Better Earth who bring valuable experience and expertise to the Company's mission, focused on reinforcing the circular economy through spearheading sustainability efforts throughout the supply chain.

The new team members include:

- Jarrod Durrence, Human Resources Manager, has over 20 years of Human Resources experience, across multiple industries. Jarrod brings over 20 years of diverse Human Resources experience, covering staffing, training, benefits, incentives, recognition, and compliance for organizational initiatives. In addition, he has proven success in developing and implementing compliance for all forms of organizational initiatives.
- Rob Landingham, Account Manager, is an accomplished sales professional with 10 years of experience in the Molded Fiber industry within the foodservice distribution and processor channels. Known for his strategic thinking and innovative ideas, Rob has made significant contributions in this field that have been widely recognized. Rob has continuously strived for excellence, continuously enhancing his skills and embracing new technologies to drive business growth. He is passionate about the Molded Fiber industry and takes pride in producing high-quality products that are environmentally friendly in his quest to rid our planet of single-use disposable plastics.
- Bryan Shanley, Account Manager, has 10 years of Account Management and Development experience in the CPG and Foodservice industries. Bryan brings experience that covers customer management, new business development, project management, negotiations, and training.

"The addition of these talented individuals to the Better Earth team demonstrates our commitment to providing quality packaging solutions and services to customers that address our industry's most pressing environmental concerns," said Better Earth CEO, Joseph Bild. "With their expertise and shared passion for environmental advocacy, we are confident in our ability to grow our brand, raise awareness of our mission, and promote our sustainable products to consumers and businesses."

The new 2 and 3 Taco Clamshells will be launched across North America in the next two months, and samples will be available at the new Better Earthbooth #1473 in the South Hall at the 2023 National Restaurant Association Show in Chicago, Illinois, from May 223.

About Better Earth

Better Earth is a leader in sustainable foodservice packaging solutions. We offer a full range of commercially compostable products, including plates, bowls, trays, containers, cutlery, cups, and lids. Our product line is made entirely from sustainable materials such as bamboo, sugarcane, FSC Certified paper and bio-based resins, making them a viable alternative to traditional plastics and virgin wood fiber packaging. Better Earth's products meet ASTM and EN standards for compostability. We are committed to helping customers meet their sustainability goals and strengthening the circular economy by leading sustainability initiatives across the value chain.
